MANUFACTURING

WHO WE ARE

ANC Manufacturing Ltd has over 30 years of experience dedicated to UK manufacturing in our site on Folkestone, Kent, under the Ancestors Group. The company has a fully trained design team to create or amend new and existing products or ideas. The company have 20 different manufacturing processes which can individually be split into their own small specialist factories all under one roof. We have been servicing the promotional industry for over 20 years, but have also been the best kept secret manufacturer, we are now letting you know.

UK Doming Factory: Resin decal domed stickers, any shape together with providing a good range of domable products.

UK Resin Casting Factory: Machine and hand casting of resin in any colour, real stone, slate or even bronze finish.

UK Metal Casting factory: Specialising in Lead Free Pewter casting to a maximum size 6 inches.

UK Printing Factory: Full colour digital printing onto any substrate, die cutting / creasing, all without the cost and set up of a die.

UK Framing Factory: Almost any frame mould can be used to make frames to your own size from small to large.

UK Game Factory: Game boards both card and wood, gaming pieces and boxes.

Feather Factory: Goose, Ostrich, Turkey, Peacock and Pheasant all stocked and made into usable pens.

Jewellery Factory: Made or designed in UK or Thailand to a high quality meeting all regulations.

Laser Factory: High quality laser engraving and cutting on both organic at metal materials.

Sourcing Factory: Specialising in custom products sourced from the East, particularly Thailand and China.

ANC Manufacturing are continually moving with technology to give you the best product and best service. Providing also small packaging solutions to complete the branding. Customisation for clients is a big strength of the business, being able to offer most products with own label packaging and designs.

Resin decal domed stickers, any shape together with providing a good range of domable products.

CUSTOM DOMED DECAL LABELS

We have been producing crystal clear resin domed decal labels / stickers since 2007 and now have two highly specialist resin decal doming machines able to use both flexible and hard resin creating any shape you require. We only use automobile grade resin which ensures a long durable crystal clear life with longevity so you can be sure of a quality resin that is not going to deteriorate in the sunlight. Having only just installed the latest XYZ axle machine we now have capacity to serve you better than ever.

HOW WE DIFFER TO OTHER DOMING COMPANIES

The quality of the finished item is not only in the clarity of the doming but also the quality of the print and this is where we win. We have spent considerable years testing and experimenting with various papers and have now developed our own printing substrate which will permanently hold a high definition colour

ink jet print to a high resolution – this means that we can colour match and also produce fine detail. Having our doming machines in their own dust free room also ensures no strange bodies getting into the resin whilst it cures.

PROMO MERCHANDISE - EASY CUSTOMISATION USING OUR DOMED DECALS

A large range of promo merchandise all suitable for taking our crystal clear high definition custom domed decals. Flexible fridge magnets, magnetic or cork backed coasters, keyrings, jewellery, spoons, pill boxes, bottle stoppers and openers and much more. Fast turn around with a full print / packaging service also available, all made to order in our factory.

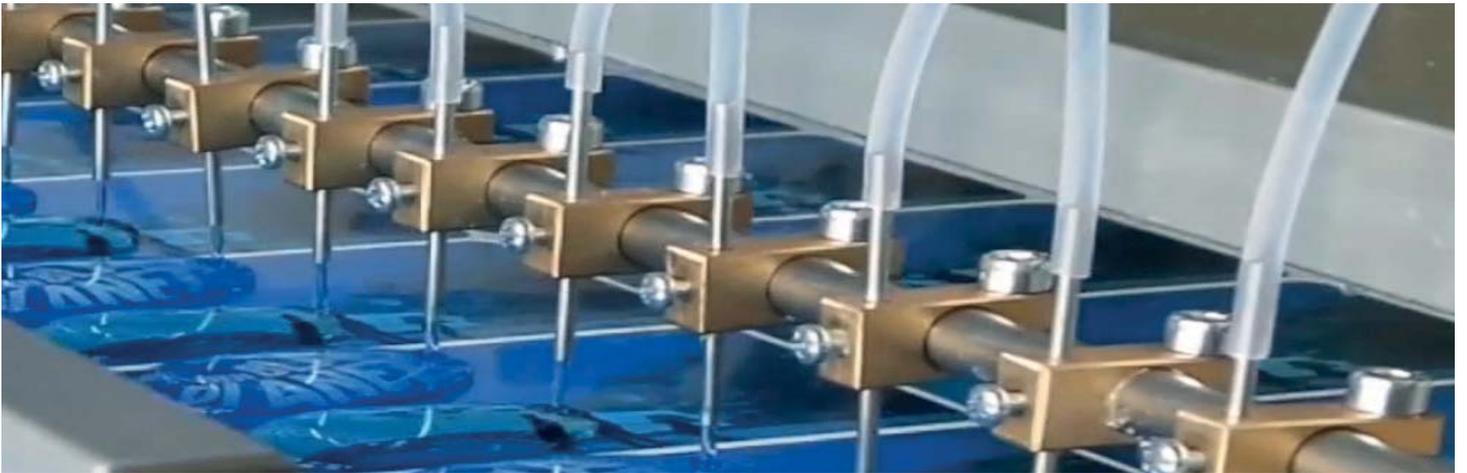

Although our quality is very high our prices are also very competitive and we are happy to give you a quotation.

3D PRINTING

Initially sought to produce perfect master items for both our resin and pewter casting processes, our 3D printing machinery enables us to also make high-quality pieces either as one-off originals or for low minimum order runs.

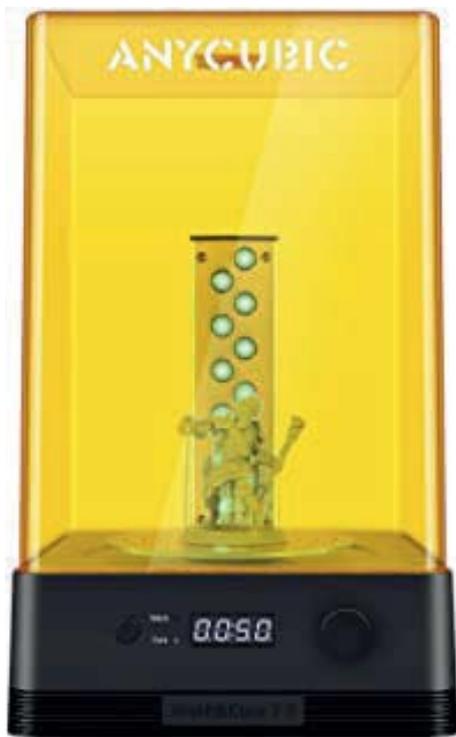

We use “Autodesk Fusion 360 3D modelling, CAD, CAM, CAE and PCB software” for product design and manufacturing and “Blender 3D software” for sculpting.

UK Metal Casting Factory

Specialising in Lead Free Fine English Pewter casting to a maximum size 6 inches.

METAL CASTING (LEAD FREE FINE ENGLISH PEWTER)

We can produce custom items using your designs or we can design for you. The production of all of our pewter products is carried out with a process called Spin Casting or Centrifugal Casting.

CASTING PROCESS

Our skilled artists use the traditional method of hand carving out of wax or pewter from original artwork or drawings.

A production mould is then made with the master casting being laid out on a silicone disc and then cured with heat and pressure in a vulcanizer. This rubber mould is then spun in a centrifugal caster while pewter is poured into the centre of the mould resulting in a replica of the master metal design. Once cooled this is then opened up and channels are cut for the molten metal to reach the impressions. These sub-masters are then put in a new production mould and placed into the vulcanizer and the above process repeated. The completed castings are fettled and rumbled to remove any sharp edges and imperfections, then polished in a light detergent before being dried in the corn drying machine. All pewter items can be finished in a variety of ways including polishing, to a bright silver colour finish; antiquing to accent the details or plated in silver, gold or other finishes.

CASTING MACHINES

We use Four modern Semi Automated centrifugal casting machine for our mass production and have several stand alone manual pouring machines for lesser amounts and more intricate work.

Per annum we process over 36 Tonnes of Pewter Tin Alloy.

Manual Centrifugal Casting Machine

ASSEMBLY

Highly skilled operators assemble and finish every item to exacting standards.

We can produce almost any shape including buttons; pin badges; golf ball markers; tooling; jewellery; findings; figurines; replica coins; medals; belt buckles; charms and Key chains.

HAND CAST PEWTER FIGURINES

St. George's Chapel, Windsor

Pewter 24ct gold plate

Our latest purchase is this 100 litre capacity vibratory bowl finishing machine.

This takes over from traditional hand finishing of precision items taking our automated finishing to the next level. This machine enables us to produce highly polished Fine English Pewter looking like Silver but no tarnishing.

Jubilee royal pearl earrings

These earrings are inspired by a pair of diamond and pearl earrings given by the "The Ladies of Devonshire" to Princess Mary of Teck in 1893. These were passed onto Queen Mary who gave them to The Queen in 1947 as a wedding present.

PACKAGING AND STORY TELLING

As with most of the products produced by Anc Manufacturing the packaging and/or romance cards tell the story of the item enclosed. Jewellery items generally have romance cards that include a picture of the original artwork that inspired it's creation together with historical information or other details. Other items mostly have Euro-hooked packaging that includes space on the reverse to tell the story. All can include bar-codes and other site specific information and branding.

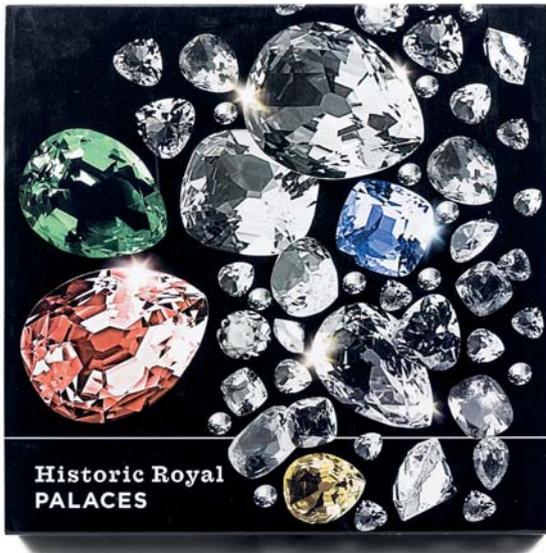

ROMANCE & HANGING CARDS

Sourcing Factory

We have over thirty years of experience sourcing products worldwide, including items from India, China, Thailand and Europe.

SOURCING

FIND OUT MORE

Our design team are happy to assist with all aspects of getting your message across. Using the latest software solutions including Adobe's Creative Suite and many others. Additional scanners and having our own photo booth means that we have all the tools needed to get the right results.

When providing your own artwork we prefer to receive PDF format artwork whenever possible, but all standard formats are acceptable at the highest resolution, at least 300dpi. Because of the numerous different printing production processes applied to the products, colours shown on artwork may vary slightly. If specific colour matches are required then colour swatches, previous examples or Pantone reference numbers should be provided.

Orders involving the reproduction of original artwork are accepted on the understanding that the customer is either the copyright owner, or has been given written permission to use it. Ancestors® Group will not be liable for any claim against the customer for copyright infringement. As such, Ancestors® Group are exempt against all incidental costs or consequential claims.

General Ordering Information

Lead Times: Being a genuine UK manufacturer means that, following customer approval for artwork, products are usually manufactured within 7-14 working days unless otherwise informed. We therefore avoid the long import schedules, that sometimes can exceed 20 weeks. ANC Manufacturing cannot be held responsible for any delays due to circumstances beyond our direct control, and you will be informed, as early as possible, should any unforeseen delays occur.

Payment: New customers should satisfy us that they are genuine distributors and, unless agreed in advance, will be issued with a pro-forma invoice and only after the funds have cleared our bank account will production commence. International buyers (those that are not resident in the UK) must provide a valid ID number. Credit facilities are available and can be applied for. Approved credit accounts receive 30 days credit from the date of invoice, longer terms are strictly by prior written agreement. We reserve the right to charge outstanding balances over 30 days a surcharge of 1.75% plus a daily interest rate of 3% above the Nat West bank rate prevailing at the time. Prices are as agreed and are subject to VAT and Carriage.

Carriage: Minimum carriage charge is £10 (UK mainland only) or at cost whichever is the greater unless other arrangements have been agreed. For overseas and off-shore Islands carriage costs will be supplied by quotation, available on request.

Reservation of Title: All goods remain the property of Ancestors® Group until paid for in full, but the risk passes to the buyer on delivery. Claims for damaged goods or shortages will not be accepted unless notified to ANC Manufacturing within 7 days. We reserve the right to examine the goods. Claims for non-delivery will not be accepted unless notified within 7 days of the invoice date
